

Circulation Software for Newspaper Business Efforts

DESCRIPTION — Newzware 8.0

ICANON provides the complete enterprise software solution for the modern publishing business model. Our product suite includes Circulation; Advertising, Financial and Production tools; deployed locally, or securely hosted by ICANON.

Unified Database

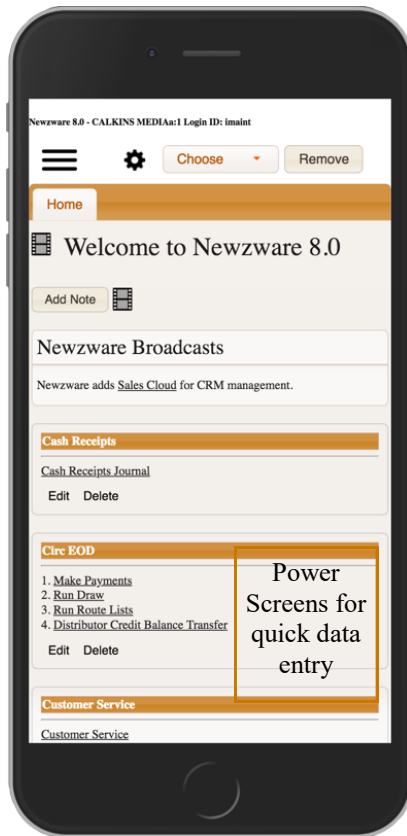

Regardless of how many Newzware products you deploy, the key to flexibility and system accountability lies with a common data source. ICANON, with its Newzware Business System, places an enterprise view of your newspaper market into the screens and reports you rely upon to move your products. A unified customer view allows information sharing among departments and accurately matches your products with your customers requirements.

Browser Based Tools

Our economy is mobile so your managers need to be also. Newzware 8 provides true secure Internet access to the Circulation system database, run and schedule reports, adjust draws, modify distribution schemes and dispatch to trouble areas. Empower your staff and reduce repetitive data entry that wears on resources.

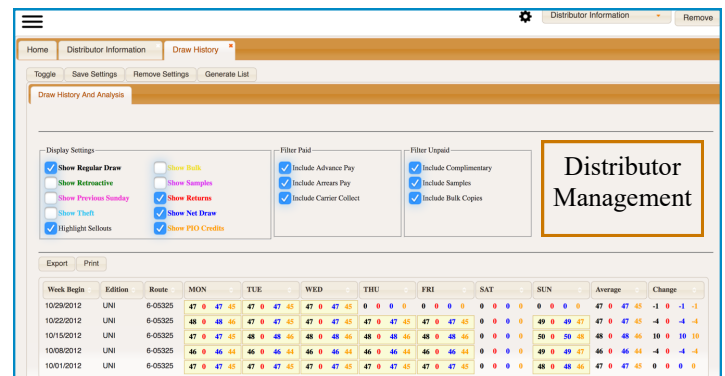

A Host of Information

Integrated demographics and postal information within Newzware maintain an accurate view of your customer to develop sales campaigns and streamline distribution.

FEATURES AND BENEFITS — Newzware 8.0

- Print—Digital—Hybrid—Management
- Simplified Subscriber and A/R Management
- On screen launch of optional mapping and customer demographics module
- Flexible intuitive report building with scheduling, distribution and output options, including email
- E-edition authentication management built in
- AAM Zone edit controls and reporting
- Simplified retail rate edit controls
- Full auditing of every manual on-screen transaction
- Intuitive tax jurisdiction process with link to State
- System security right down to the transaction level
- Pre-authorized PIO subscriber payments (bank debit transaction)
- Credit card PIO subscriber payment processing
- Advertiser, Subscriber, non-subscriber, Classified customer viewed as single data source
- Multi-edition, issue, and TMC support with individual routing and grace period configurations
- Dispatch monitor for shortages and missed papers
- Extensions module for ad hoc database fields without program charges – demographic repository
- Marketing penetration reports
- Promotion management for retention analysis
- Distributor invoices on bundle wrappers or collated
- Insert management by user-defined market zones
- Free system upgrades for maintenance customers

SPECIFICATIONS & MORE FEATURES

Requirements

Server

- Linux on Intel®, Windows 2016

Client

- Internet Browser

Database

- Any SQL compatible database

ICANON Hosting Services Available

Single Copy Management

Dealer and POS management is key to newspaper efficiency. Bulk draw corrections can be entered as permanent or event driven criteria with notes to document changes for future AAM audits. Remote return and payment collection data entry through **Newzware Collector Module**. Separate NIE/Charity management of sponsorships and distribution (both print and on line) .

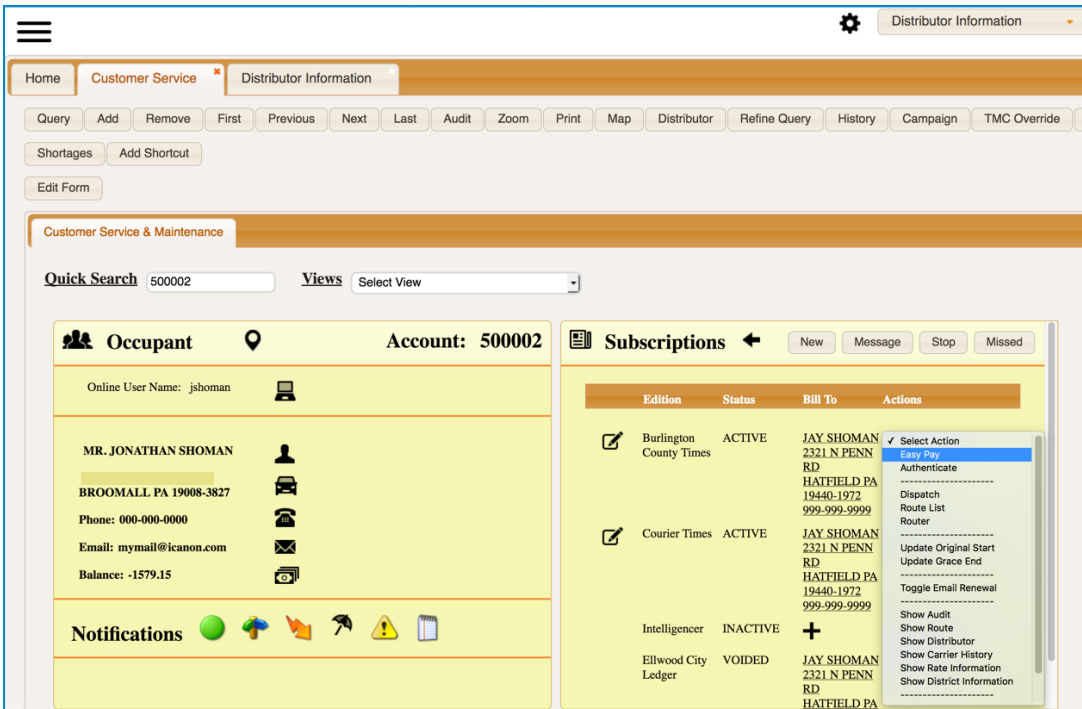

Targeted Marketing and Distribution

Market zones are only limited by your distribution and mail room methods. Micro zones can be established based on geographic criteria such as zip code or established by demographic data purchased or imported into the inclusive Newzware Extensions module. This module allows for establishment of any additional data fields by the

newspaper without programming assistance from ICANON. In conjunction with Newzware Advertising, insert management and market zones are automatically established with feeds to sorters and stacking equipment. As insert inventory is depleted, new bundles are created using available stock and noted on reports. Powerful flexibility leading to increased revenue.

Internet Connectivity

Communication with your customer should not be limited to telephone or mail. The age of the Internet has placed expanded expectations on any customer service business element. Newzware provides **Web Subscriber Self Service, Carrier Self Service and Distributor Self Service**; all password protected and managed by Newzware. Registered customers, both new and existing, can start and pause subscriptions, purchase single copy or special editions, review and pay invoices and communicate with district managers about concerns. Carriers can get route lists, pay invoices, order supplies and communicate with managers. Further, Newzware Circulation includes real time On-Line content authorization so no extra costs & shared files with third party content providers are needed. See **Web Self-Service Data Sheet**.

Customer Service

The work horse of any Circulation system is the customer service screen. Pertinent information available for instant verification. Identify your caller as a loyal customer, classified client, delivery or complaint problems, vacation, subscription in grace or canceled. Messaging between dispatch and customer service provides an instant update of delayed distribution. On-screen mapping available

2321 North Penn Rd., Hatfield, PA 19440 / p215.822.5519 / sales@icanon.com / www.newzware.com

Web Self-Service Applications for Newspaper Management -

DESCRIPTION

Keying information two and three times creates errors and wastes time. This popular Newzware module, integrated with Newzware Circulation, provides a two way information link through your newspaper's web site to address Subscriber inquiries of Account, Distribution and Subscription data directly with the Newzware database.

New Subscriber

New subscribers can visit your web site, provide basic information such as address and contact information, choose from a prepared menu of subscription choices, provide payment information and receive a confirmation email without ever tying up a Customer Service Representative. Digital access is granted immediately and print ready for the next draw date. All contact information and subsequent billing

and routing is processed into the Newzware enterprise database. Login and passwords are generated by the user or Social Media logins accepted so the subscriber has consistent access to your web content. Of course there are built in provisions for retrieving forgotten login and password information in a secure fashion. If the on-line content is an Internet read only service, Newzware will authorize each entry for content based on the Circulation information. If you need to further protect your digital content with a pay barrier, the optional Newzware E-Pass system is available for metering, E-Wallet (retainer) and Day Pass (digital single copy) marketing efforts.

Statistics

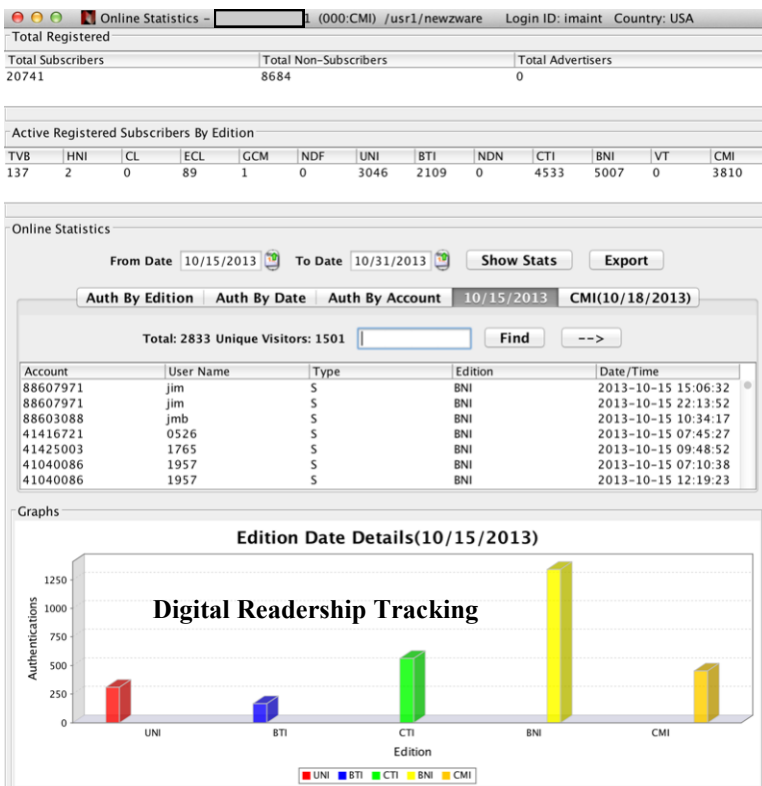

A new online statistics screen is available under the Newzware Circulation System Administration menu option under Tools. This feature tracks the total amount of online accounts within the web self service system grouped by Non Subscriber, Subscriber and Advertisers all tied to and grouped by edition.

Tracking the number of authentications by product edition, Newzware sums the validations and, with a query, presents a value for a range of dates selected by the Newzware user. Data can be exported to spreadsheet programs for further analysis with a single button. Selecting any Account Number in the query will launch Newzware Customer Service with that Subscriber in focus. Powerful reporting for the digital age.

Existing Customer Service

Subscribers are moving to on-line communications

(Continued on page 2)

(Continued from page 1)

more and more. This capability within Newzware Circulation provides a view of current subscription information including start and end dates. The customer can provide vacation and move information with a couple keystrokes. They can send messages to carrier, district manager and whomever else you choose without tying up a phone line. Powerful stuff for a powerful Circulation System. Any peripheral or demographic information collected through contests, surveys etc. can be imported directly to Newzware Demographic Extensions Module.

Requirements – Server

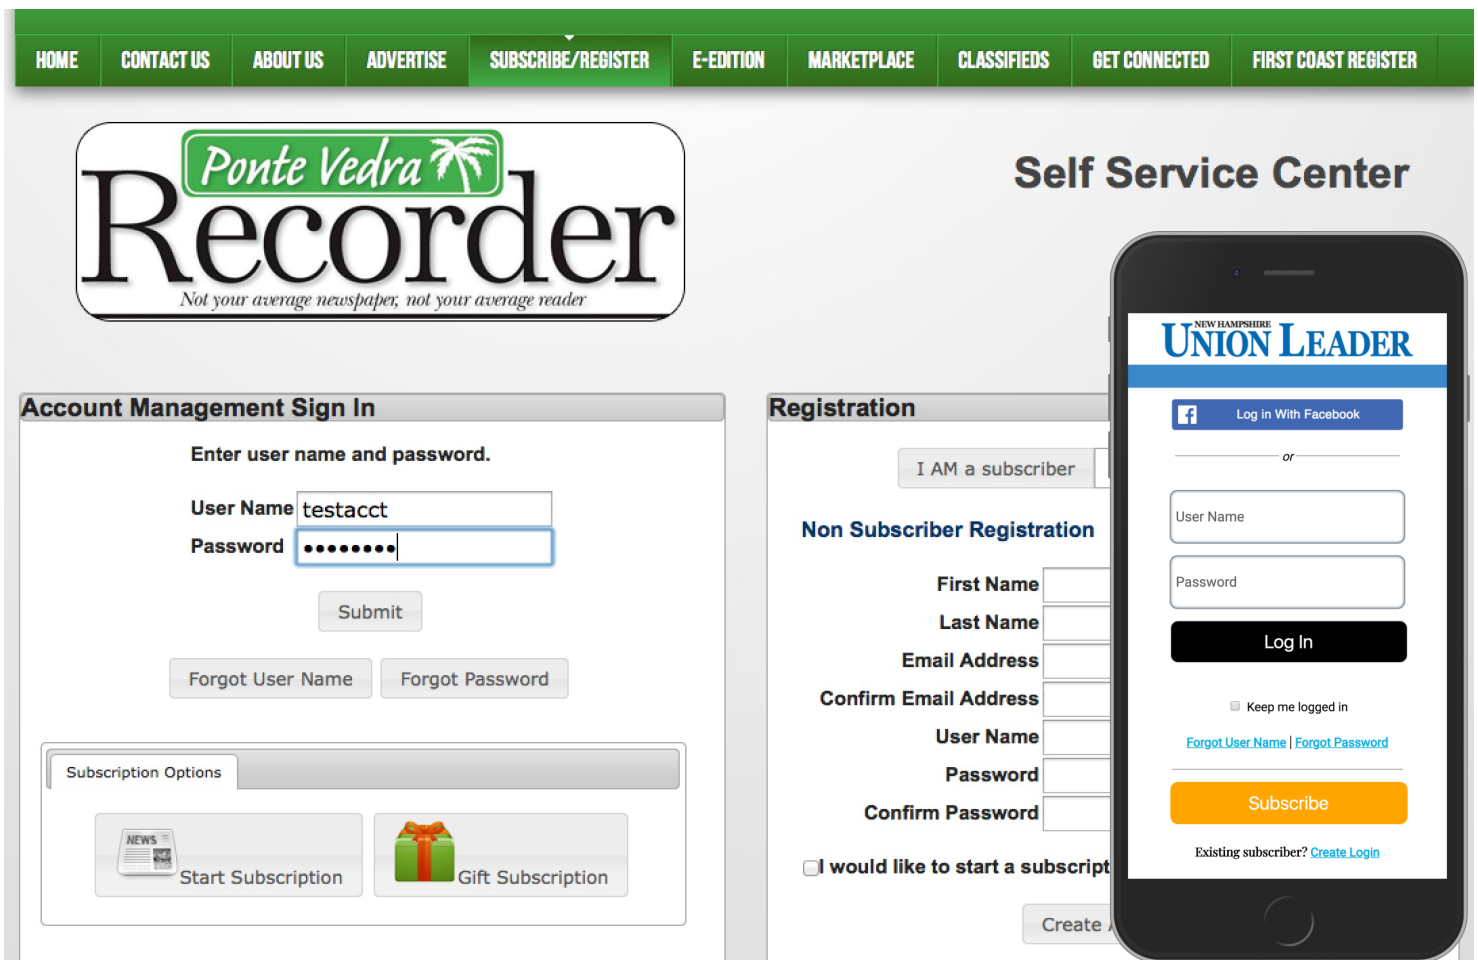

- Newzware Circulation site license

Client

- Any modern Browser device interface including Android Tablet and i-Pad

Features

- Complete real time payment module handling Credit Cards, Debit ACH
- Real time E-edition authentication to most CMS systems
- E-Pass Metering and Single Copy transaction software is optional
- Multi-edition, issue and product aware
- Targeted advertising - user demographics – Event Marketing
- Questions, surveys, contest information directly linked to Newzware Extensions module internal to Circulation
- Complete unaided new subscription starts and customer services such as vacations, moves and complaints.
- Secure screens by user or group of users
- Complete Online Subscriber Statistics

The screenshot displays a web interface for a newspaper's self-service center. At the top is a green navigation bar with links: HOME, CONTACT US, ABOUT US, ADVERTISE, SUBSCRIBE/REGISTER, E-EDITION, MARKETPLACE, CLASSIFIEDS, GET CONNECTED, and FIRST COAST REGISTER. Below this is a large logo for 'Ponte Vedra Recorder' with the tagline 'Not your average newspaper, not your average reader'. To the right is a 'Self Service Center' section featuring a smartphone displaying the 'NEW HAMPSHIRE UNION LEADER' app interface. The main content area is divided into two panels: 'Account Management Sign In' and 'Registration'. The sign-in panel includes fields for 'User Name' (testacct) and 'Password' (masked with dots), a 'Submit' button, and links for 'Forgot User Name' and 'Forgot Password'. Below is a 'Subscription Options' section with 'Start Subscription' and 'Gift Subscription' buttons. The registration panel has a radio button for 'I AM a subscriber', a 'Non Subscriber Registration' section with fields for 'First Name', 'Last Name', 'Email Address', 'Confirm Email Address', 'User Name', 'Password', and 'Confirm Password', and a checkbox for 'I would like to start a subscription'. A 'Create' button is partially visible at the bottom.

On Line Marketplace Module -

DESCRIPTION

Newzware On-Line Marketplace Module -

Web browser application to extend your newspaper's product mix through your web portal. Unleash the full power and strength of your Newzware software investment. We offer complete order processing, inventory, fulfillment, shipment and payment tracking coupled or separated with your subscription services and the Newzware Self Service Module. Order processing and reports are available through tabs within Newzware Customer Service screens and tightly integrates your customer database with the e-commerce opportunities through the Internet.

The Newzware Marketplace Module is designed to minimize fulfillment errors and extend your revenue reach among your customer base. Payments are securely processed in real time using your CDM authorization and Newzware. Receipts are sent to clients via email so the ever

important collecting of email addresses for future marketing is a plus.

Offer overstocks, event tickets, local specialties, sports wear, membership opportunities... the creativity of your marketing department is in play.

Features include:

- Product categorization for your web site.
- Buyer information validated against Subscriber database and added if missing
- Inventory Management with stock numbering, quantities, tracking and low volume alerts
- Complete shipping information including weight, box sizes and cost—made available at time of order and estimating shipping costs
- Accommodates Pre-Order fulfillment and billing
- Upload multiple photos of product (s) offered
- Cart Management
- Complete tracking from order to delivery
- Send order confirmation and receipts by email
- Complete synergy with central Circulation system
- Supports bundling product with unique subscription offers through your Circulation efforts
- Great vehicle for Membership offers in concert with local advertisers and suppliers
- No revenue share with Marketplace Module
- Complete order and inventory reports
- Internal order fulfillment screens displayed on tablet device

Mapping & Routing Applications -

DESCRIPTION

Newzware Mapping - Google® Toolkit

The Newzware mapping module is designed to augment the Newzware Circulation products and to provide a comprehensive tool set for displaying not only subscriber, dealer and TMC client locations within Customer Service but also carrier routes, truck routes and single copy saturation levels for multiple delivered products. The service can be provided in a basic package for reviewing subscriber and distributor locations or an advanced /optimized package used for dynamic Rerouting and Optimization.

Basic Package

Using the Google® Toolkit , ICANON has developed a mapping application that dovetails with the power and flexibility of the Newzware Business System. Features include:

- Integration with Newzware address correction
- On-the-fly geocoding (latitude / longitude) of addresses.
- Mapping of single or multiple household addresses from within Customer Service with extensions data (demographics)
- Subscriber Route List mapping with turn-by-turn driving instructions integrated with Newzware delivery directions.
- Dispatch / Recovery mapping (households that require redelivery across multiple route boundaries on demand)
- Single Copy / Home Delivery Truck Route mapping with turn-by-turn driving instructions.
- Route List Walk Sequence / Re-sequencing Export / Import to or from spreadsheet
- Drive time and distance

Delivering your product. The culmination of your team's effort to win your customer's trust, engage them with content and market to their needs. Newzware Circulation & Mapping insures that delivery.

Newzware E – Pass

Digital Readership Management and Authorization

DESCRIPTION — Newzware 7.0 Circulation E-Pass

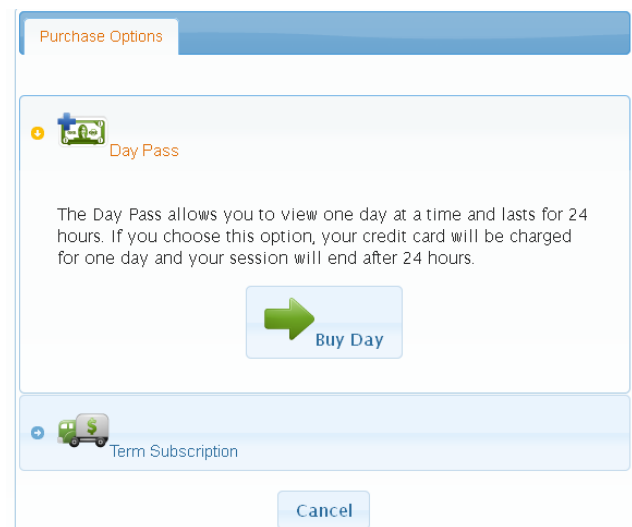

ICANON provides the complete enterprise software solution for the modern newspaper business model. Our Circulation product coupled with an extension to the Newzware Web Self-Service Module (SSM), provides a simple delivery method for your CMS protected web publishing content; reaching today's modern occasional reader. Full ABC Subscription, Single Copy or Single Article functionality is obtained plus authenticated media access through the Internet.

Keep It Simple

Today's readers have an abundance of options. They visit your on-line product because they have an interest in your unique content. Translate that interest into revenue or targeted advertising. More importantly, do so efficiently and conveniently. Newzware **E-Pass** manages all of the front end communications, back office transactions and A/R balances.

As an example, when a reader is directed from your web site to the Web SSM to establish a single copy account, apply your business rules to create an ROI with this customer. It could be a single payment through a credit card, an E-Z pay

scenario or perhaps, participation in targeted demographic information capture.

Offer your customers options for how they purchase content. Or restrict them to one dynamic—your choice. The following Newzware E-Pass attributes are available to market your media content.

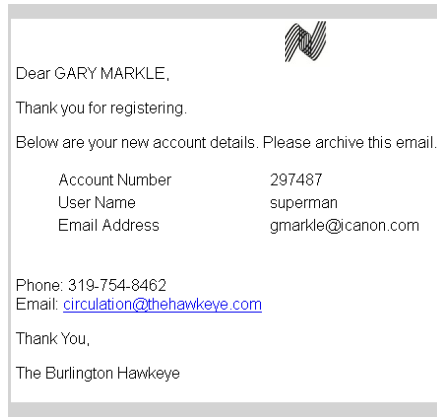

- ◆ **Bundled**—Print and Digital subscription
- ◆ **E-Wallet**—a pay in advance balance is retained and User draws from that balance as they purchase Single Copy access
- ◆ **Metered**—Business rules to allow teaser or limited access to sectional or full content and counted by article, page, etc. or when in conjunction with E-Wallet, payment per article/page etc.
- ◆ **Day Pass**—single 24-hour purchase concept

The latter two are designed to protect content whereas the E-Wallet also protects a balance. All options re-

quire a credit card payment and a sign up process that will include an email address. Log in requires user name and password, previously confirmed by email.

Workstation, Tablet, Phone—any Internet connection provides real time access and authorization.

Once an account is established, accessing your published secured content is simple and effortless for the customer. **Newzware E-Pass** checks A/R balances and authorizes user identity.

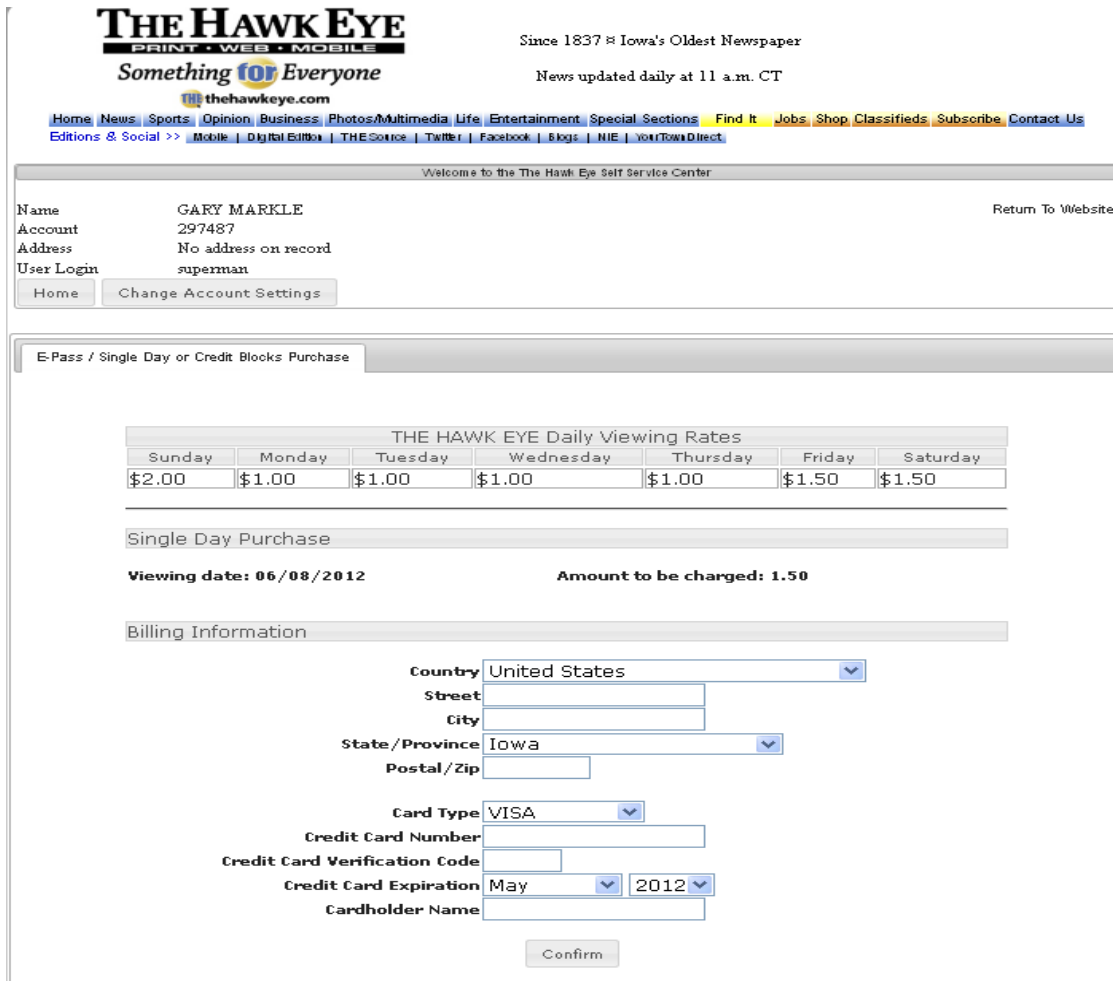

Unified Database

As with all Newzware modules, information is database dynamic and centric for reporting and continued customer relationship management. Each E-Pass transaction is tracked and appropriate A/R balances maintained for one publication or many. Your business plan is in play and Newzware flexibility is a continuous key to success.

A Host of Information and Opportunity

Consider the demographic opportunities with target advertising to this powerful market. Utilizing Newzware’s demographic extensions, e-edition advertising can be booked through Newzware Advertising and delivered to the occasional subscriber as part of their e-content delivery.

Collector Module -

DESCRIPTION

Newzware Collector- Optional Google® Toolkit

Web browser application to load collection route sequence and download drop information such as single copy returns, payments and delivery notations straight to the Newzware Circulation database. Recommended appliance would be tablet or larger screen smart phone running standard web browser software.

The Newzware Collector module is designed to eliminate collection errors and speed up reporting for proper drop management. Payments are recorded and totaled to provide accurate reconciliation after the collection is complete. Receipts can be sent to store clients via secure email.

Directions

Using the optional Google® Toolkit via the Newzware Mapping option, ICANON delivers turn by turn directions from a starting point or from current location during interrupted sequence.

Other Features include:

- On-the-fly geocoding (latitude / longitude) of addresses.
- Send receipts for full or partial payment to secure email
- Upload multiple routes and toggle between routes
- Subscriber Route List mapping with turn-by-turn driving instructions integrated with Newzware delivery directions.
- Complete synergy with central Circulation system
- Review entered returns at the push of a button
- Point to point directions
- Drive time and distance

The Log Out button should be used at the end of the day. The log out will check for any unsaved changes, and if found, prompt the user to mark them as done. You cannot log out if there are unsaved changes.

The Route Complete button finalizes the route. If unsaved changes are found, it will highlight them in red and mark them as unsaved. A prompt will ask to review or save them. Once all are saved, all items will be marked as done and the files will be created on the Newzware server. This should only be clicked when all collections are done.

Log Out Review Route Complete

Search: 1-93461 - ACME MARKETS
Search for routes will automatically open that route when selected from the list

Legend for status

Saved routes will be in green with the word SAVED next to the route description. These items have been saved to the Newzware database.

- * Indicates drop not attended
- * Indicates unsaved drop
- * Indicates saved drop

Total Payments \$1.75
Total Returns 6

Truck: 109 - 109

Items in red will be marked as UNSAVED and are not saved in the database. They require review and need to be marked as Done by clicking the Done button. They may also be cleared, which will zero out the returns and any payment and return the status to Not Attended.

- 6-84009 - BELLE VERNON MCDONALD'S (SAVED)
- (UNSAVED)6-90208 - DEL TRK 13/DEL VIA MR 18943 BELLE VERNON GIANT EAG
- 6-90280 - DELIVER VIA MR 09943 350 TRI-COUNTY PLAZA
- 6-90350 - DEL TRK 13/DEL VIA MR 18943 ECKERD/843 ROSTRAVER R

Unattended routes are those routes that have not been edited yet. The Done button has not been clicked on these routes. Using the Clear button will return the route to this status.

1-96819 - WAWA #221 550 EASTON RD, WARRINGTON

If a receipt is desired, check the check box and enter the email address. The email address will default to the one on record for the route if one exists. Emails are sent when the Done button is clicked and the data is saved to the database.

Done Clear

Clicking the clear button will zero out any returns and payments and will return the route header status to Not Attended.

To Pay In Full: \$785.07 Make Full Payment

Clicking the Make Full Payment button will place the correct full payment amount in the Payment Amount field for each edition.

Clicking the Done button will attempt to save the entries to the database. If an Internet connection is present, the status will be changed to Done and will be marked as done. The Newzware database will then contain the entries. If an Internet connection is not present, or an error occurs while trying to save the entries, the status will be changed to Unsaved and a message displayed in the top left corner changing the route header to the below.
